CS1 Molded Tip

CS2 Vitrified Tip

CS (closed system) tissue grinders are designed for safety.

New!

CS1 and CS2 Closed System Tissue Grinders

- Molded tips for standard grinding
- Vitrified tips for aggressive grinding of tougher tissue
- Sterile and individually packed in convenient, easy-open packs

15 mL

50 mL

Closed System Tissue Grinders minimize personal contact with potentially harmful samples.

safer Grinding

CS1 Sterile Tissue Grinders for Standard Grinding

- Closed system protects you and your sample
- Convenient and easy-to-use
- Engineered for performance

CS1 Sterile Tissue Grinders are easy to use and designed for your safety. Tissues are ground within a sealed container to minimize the risk of personal contact - exposure to sample aerosols is eliminated. Narrow pestles eliminate the potential of sample overflow common with other types of grinders. The molded-in abrasive surface on the pestle tip leaves no sediment to obstruct sample examination. Each grinder comes with a fully assembled pestle, a conical sample tube with solid top cap, an adhesive identification label and an instruction card. All are gamma sterilized in easy-open Tyvek® packs. Tubes are made of PP, pestles are 30% glass-filled PP and caps are HDPE.

Catalog No.	Description	Case Qty.
749600-0015	15 mL	10
749600-0050	50 mL	10

CS2 Sterile Tissue Grinders for More Aggressive Grinding

- Vitrified pestle tips for tougher tissues
- Same closed system for your safety

CS2 Sterile Tissue Grinders are similar to the CS1 grinders but with a vitrified tip for more aggressive grinding of difficult samples. The proprietary silica casting process results in a glass-like abrasive tip surface that makes it easier to homogenize fibrous samples. The closed system design allows for grinding to take place within a sealed container. Each grinder comes with a fully assembled pestle, a conical sample tube with solid top cap, an adhesive identification label and an instruction card. All are gamma sterilized in easy-open Tyvek® packs. Tubes are made of PP, pestles are 30% glass-filled PP, caps are HDPE and vitrified tips are cast silica.

Pellet Pestles, RNase / DNase / Pyrogen-Free, Disposable

- Individually wrapped to ensure purity
- Autoclavable blue polypropylene

Catalog No.	Description	Case Qty.
749520-0090	1.5 mL RNase-Free Pellet Pestle with Tube	100
749520-0590	0.5 mL RNase-Free Pellet Pestle with Tube	100
749521-0590	1.5 mL RNase-Free Pellet Pestle Only	100
749521-1590	0.5 mL RNase-Free Pellet Pestle Only	100
749510-0590	0.5 mL RNase-Free Microtube Only	100
749510-1590	1.5 mL RNase-Free Microtube Only	100

Pellet Pestles with Matching Tubes, Disposable

- Autoclavable blue polypropylene pestles

Catalog No.	Description	Pestle Length (cm)	Case Qty.
749520-0500	0.5 mL Pellet Pestle with Tube	7	100
749520-0000	1.5 mL Pellet Pestle with Tube	7	100
749521-0500	0.5 mL Pellet Pestle Only	7	100
749521-1500	1.5 mL Pellet Pestle Only	7	100
749560-0500	0.5 mL Tube Only, Natural	—	1000
749560-1500	1.5 mL Tube Only, Natural	—	500

Stainless Steel / CTFE Pellet Pestles, Reusable

- For micro centrifuge tubes
- Reusable and autoclavable

Catalog No.	Description	Pestle Length (cm)	Case Qty.
749516-0500	0.5 mL Pellet Pestle Only	6	1
749515-0000	1.5 mL Pellet Pestle Only	14	1
749515-1500	15 mL Pellet Pestle Only	21	1
749515-5000	50 mL Pellet Pestle Only	21	1

Pellet Pestle Cordless Motor

- For all Pellet Pestle mixers, comes complete with two AA batteries

Catalog No.	Description	Case Qty.
749540-0000	Pellet Pestle Cordless Motor	1
749541-0000	Replacement Motor Adapter	1

Tissue Grinder Kit with Glass and PTFE Pestles

- Includes ground glass, smooth glass and PTFE grinders suitable for tough connective tissue and soft tissue such as brain or liver.
- Kit items are packaged in a convenient high-density polyethylene case with die cut foam inserts that protect grinders in transit and in storage.

Catalog No.	Description	Case Qty.
884900-0000	Complete Tissue Grinder Kit	1

Kit contains one each of the grinders listed below.

Catalog No.	Grinder Type	Pestle Material	Working Cap. (mL) ¹
885470-0000	Micro	Ground Glass	0.2
885490-0017	DUALL® (with cap)	Ground Glass	0.3
885480-0020	DUALL	PTFE	1
885500-0019	Potter-Elvehjem ²	Ground Glass	1
886000-0019	Potter-Elvehjem ²	PTFE	1
885000-0002	Tenbroeck ²	Ground Glass	2
885300-0002	Dounce ³	Smooth Glass	2

¹ Approximate volume with pestle inserted (except 885490).

² Suitable for motor-driven homogenization.

³ With one large clearance pestle and one small clearance pestle.

Polypropylene
Pestles and
Tubes

Stainless Steel
Shaft with

GLASS TISSUE GRINDERS

Dounce
(Two pestles supplied.)

Dual®

Micro

Dounce All-Glass Tissue Grinders

Designed for cellular work where the nucleus remains intact after homogenization.

- Large clearance pestle used for the initial sample reduction
- Small clearance pestle used to form the final homogenate
- Replacement components available and completely interchangeable

Catalog No.	Working Cap. (mL)	Pestle "A" Large Clearance (in.)	Pestle "B" Small Clearance (in.)	Tube Overall Length (mm)	Case Qty.

DUAL® All-Glass Tissue Grinders

- Combines both conical and cylindrical surfaces to efficiently reduce tissue and produce a uniform homogenate
- Ground glass model for connective tissue such as muscle, heart and lung
- Strong enough to allow the pestle to be motor driven using an adapter
- Replacement components are available and completely interchangeable
- Clearance between pestles and tubes is 0.004" to 0.006"

Catalog No.	Size	Working Cap. (mL)	Pestle Overall Length x Shaft O.D. (mm)	Tube Overall Length x Reservoir O.D. (mm)	Case Qty.
885450-0020	20	1	155 x 6	80 x 13	1

885450-0025	25	50	345 x 16	225 x 38	1

Micro All-Glass Tissue Grinders

- Designed for dispersing small quantities of tissue in buffer solution
- PTFE bearing prevents misalignment and avoids aerosol formation
- Packed in six matched sets per carton

Catalog No.	Working Cap. (μL)	Pestle Overall x Shaft O.D. (mm)	Tube Overall Length x O.D. (mm)	Case Qty.
885470-0000	200	75 x 3	33 x 8	6

Tissue Homogenizer Quick Reference Chart

Style	Desired Action	Tissue Types
Dounce	cells separated but nucleus left intact	brain, kidney, liver, lung, spleen, thymus
Dual®	cells ruptured to release contents	muscle, heart, connective tissue
Micro	cells ruptured to release contents	muscle, heart
Potter-Elvehjem	cells ruptured to release contents	brain, kidney, liver, lung, spleen, thymus
Tenbroeck	cells ruptured to release contents	muscle, heart, connective tissue
