	method	Unit	measured value	lower limit value	upper limit value	status
appearance, concentrate	visual		grease, darkbrown			<input checked="" type="checkbox"/>
Penetration (/10, 25°C)	Extern	mm	214.00	210.00	230.00	<input checked="" type="checkbox"/>

### Comment

The analysis values reported in this certificate were determined immediately following the product manufacturing. This batch matches the batch of the bulk product and allows its traceability. A legally binding assurance of given properties or of suitability for a given use cannot be presumed on this basis. Inappropriate transport and/or storage may cause variations in the values. The certificate does not relieve the user from carrying out own tests of the product's properties and suitability for the intended use.

### Confirmation of product conformity

We hereby confirm that the information supplied above is authentic and correct. This batch was manufactured, filled, analysed and released in full compliance with the requirements and processes of our quality management system. This batch can therefore be used up until the shelf life expiry date stated on the certificate and printed on the product label.

### Name and position of the person responsible for product release

Ulrike Füss, Head Quality Control

### Place, date and signature of the person responsible for product release

Zuchwil / Switzerland, 03.03.2017
